DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-16, drawn to a device worn by an animal for detection of mountings among animals.

Group II, claim(s) 17, drawn to a device placed in an organ of a female animal for detection of mountings among animals.

Group III, claim(s) 18-20, drawn to a process of automated detection of mounting among animals.

The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups II and III lack the special technical feature of the fastener of Group I. Group II also lacks the special technical feature of means for identifying an electronic tag of Group I. Group III lacks the special technical feature of means for transmitting of Group II. Further, in accordance with 37 CFR 1.475(c) there are claims directed to more than one of the combinations of categories of inventions as set forth in paragraph (b), therefore unity of invention may not be present.

2.

3. A telephone call was made to John Egbert on 10/27/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 3643

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
